

ELV Waste Disposal Site Environmental Review & Guidance Manual

The Ontario Automotive Recyclers Association (OARA) and Prime Environmental have pulled together, in one convenient solution, all of the necessary items to better understand your compliance obligations for the new EASR End-of-life Vehicle Waste Disposal Site regulations required by the Ontario Ministry of Environment.

This Guidance Manual will assist owners and managers develop and train employees to comply with regulations, and provide a starting point for developing your facility's environmental program.

In addition to simplifying the requirements, the Guidance Manual also provides practical tools, forms and Industry's Best Management Practices. As information continues to develop, you will be updated on changes, enhancements and interpretations relevant to your business.

The service consists of two (2) elements - a Guidance Manual, which can be digitally downloaded and printed at your location or a pre-printed and mailed version PLUS an optional Onsite Implementation Consultation. This Onsite Implementation Consultation is mandatory for those ELV processors who have NOT had an audit to the Canadian Auto Recyclers Environmental Code (CAREC). It is optional, but encouraged, for CAREC audited facilities. The Guidance Manual and all of its supporting materials are very comprehensive and every ELV Processor would benefit from the Onsite Consultation.
